

BISWAJIT SAHOO

Computer Science Engineering Student

biswajitsahookunu2005@gmail.com — +91-81443-78982 — Bhubaneswar, Odisha, India

[LinkedIn](#) — [GitHub](#)

Professional Summary

Computer Science Engineering student with strong problem-solving skills and a solid foundation in Data Structures & Algorithms, OOPs, DBMS, Operating Systems, and Computer Networks. Skilled in full-stack web development and machine learning with hands-on experience building scalable web applications, REST APIs, and ML-based projects. Passionate about software engineering, backend development, and solving real-world technical problems.

Education

Bachelor of Technology (B.Tech) in Computer Science Engineering

Expected May 2027

C.V. Raman Global University, Bhubaneswar

CGPA: 8.87 / 10

Projects

User Behavior Analysis using Machine Learning

 [GitHub](#)

Aug 2025

Tech Stack: Python

- Developed a machine learning-based classification system to analyze and predict online user behavior patterns from social media data.
- Performed data preprocessing, feature engineering, feature scaling, and model optimization to improve prediction performance.
- Evaluated model performance using appropriate metrics and documented experimental findings through structured reports and visualizations.

Student Management System

 [GitHub](#)

Dec 2024

Tech Stack: Java, JDBC, MySQL, OOP

- Built a console-based Student Management System using Java, JDBC, and MySQL to streamline student information management.
- Designed and implemented CRUD functionalities with JDBC for efficient database interaction and persistent data storage.
- Leveraged Object-Oriented Programming principles and exception handling to develop a scalable, reusable, and robust application.

Anomaly Detection in Network Traffic

 [GitHub](#)

Oct 2025

Tech Stack: Python, scikit-learn

- Developed machine learning models using SVM, Random Forest, and Isolation Forest to identify anomalous patterns in network traffic.
- Performed feature engineering, data preprocessing, feature scaling, and hyperparameter tuning to improve model performance.
- Compared model accuracy using evaluation metrics and visualized detection results with Matplotlib for effective analysis and interpretation.

Technical Skills

- **Programming Languages:** Java, Python, JavaScript
- **Web Development:** React.js, Node.js, Express.js, Next.js, HTML, Tailwind CSS
- **Databases:** MySQL, MongoDB, PostgreSQL
- **Tools & Platforms:** Git, GitHub, Linux, Postman, VS Code
- **Machine Learning:** scikit-learn, NumPy, Pandas, Matplotlib

Certifications & Learning

- GeeksforGeeks 160 Days of DSA Challenge
- Smart Interviews Smart Coder Certification – Bronze Certified (Global Rank: 15045)
- Google Cloud Career Launchpad – Generative AI Leader Track
